Over the past two years, Lawrence Family Development Charter School's STEM initiatives received generous support from the Iyer Foundation of North Andover. The Iyer Foundation, led by Anupama and Vijay Iyer, donated funds for computer hardware, software and after school staff stipends for two, full-year computer coding courses. These courses impact 50 upper school students in grades 5-8. The coding programs enlighten students about computer language and programming. Long-term, the program aspires to influence a higher rate of acceptance into admissions-based, competitive high schools for Lawrence Family Development Charter School's eighth grade graduates. Our students, parents and staff are most grateful to the Iyer Foundation!
